---

### Summary

High school student with strong interests in mathematics, computer science, and machine learning. Experienced building educational and productivity-focused software in Python and Java, with particular interest in algorithmic problem-solving and systems design.

### Technical Skills

**Languages:** Python, Java, C, Scratch

**Concepts:** Object-Oriented Programming, Data Structures (basic), Algorithms (introductory)

### Technical Projects

#### **Block Blast Solver (Java, JavaScript, HTML/CSS) | 2026**

- Developed an algorithmic puzzle-solving tool that analyzes Block Blast board states and generates optimal block placement
- Built the core solving logic in Java and adapted the project into a web-based interactive application
- Designed a user-friendly interface allowing users to recreate game boards and test solver-generated solutions in real time
- Applied recursive search and grid-based logic

#### **Productivity Automation Tool (Python, Tkinter, Visual Crossing API) | Sep 2025 – Nov 2025**

- Built a 750-line Python GUI application integrating user inputs, multi-step calculations, and external API data to generate structured schedules and automated email reminders.
- Integrates homework durations, upcoming assignments, class schedules, and weather forecasts to generate structured notifications that improve workflow management.

#### **Interactive Periodic Table & Chemistry Helper (JavaScript, HTML/CSS) | Dec 2024**

- Developed a web-based interactive periodic table that allows users to search by element name, symbol, atomic number, or atomic mass, displaying structured information dynamically.
- Designed for class: used by classmates in chemistry class to efficiently access element data for assignment efficiency

### Work Experience

#### **Head Math Tutor, Russian School of Mathematics | Jan 2024 – Present | Wellesley, MA**

- Led in one-on-one tutoring, working with 3-10 students per week (grades K-8), organized PR events to promote programs and increase community engagement, and set up large-scale events.
- Led RSM's tutors, coaching, training, and managing the tutoring department, improving program effectiveness.
- Assisted with the Homework Help program and planned events/projects to enhance student learning and engagement.

### Relevant Coursework

- |                         |                      |                    |
|-------------------------|----------------------|--------------------|
| • AP Computer Science A | • Honors Precalculus | • Honors Chemistry |
| • Python Programming    | • Honors Physics     | • Honors Biology   |

### Education

- Wellesley High School | High Honors Roll (3.85 GPA) | Class of 2027
- Russian School of Mathematics | 2014-2023

### Extracurriculars

#### **Varsity Track and Field Sprinter, Wellesley Raiders | 2024 – Present | (Sprint Captain, 2026-2027 season)**

- Competed in varsity sprint events during the winter and spring seasons
- Selected to serve as team captain for the Winter 2026–2027 season.

#### **Middle Eastern Student Alliance | Co-President | September 2023 - Present**

- Lead planning and execution of cultural events, presentations, and charity bake sales, reaching diverse student audiences.
- Coordinate logistics, collaborate with peer leaders, and foster an inclusive environment for students of all backgrounds.
- Promote awareness and understanding of Middle Eastern culture through monthly activities and initiatives.

#### **Debate Club, Wellesley High | Member | September 2023 - Present**

- Participate in debates on contemporary topics, practicing structured argumentation and critical thinking.
- Helped plan and run a club bake sale, raising funds and supporting club activities.

### Achievements and Certifications

#### **Elmore Lundgren Junior Mathematics Book Award | June 2026**

- Awarded to one junior out of the entire class for high-level excellence and achievement in mathematics.

#### **Harvard's CS50: Introduction to Computer Science, Harvard University | Expected Completion September 2026**

- In progress; completing problem sets in Python, C, and SQL, gaining hands-on experience with algorithms, data structures, and software development fundamentals.

#### **CPR Certified | Expires January 2027**

- Certified in administering CPR and using an AED
